Summary

I am a Full-Stack Web Developer working to get into the Game Industry as a Game Programmer. I am very passionate for video games and work towards my dream of making game development my full-time career.

My programming experience encompasses 5 years in the web development industry as a full-stack .NET developer. I am very fluent with C# and Unity. I have worked solo and on small teams. I value communication and feedback among my team members. I am highly passionate for video games and game development. I am extremely detail orientated, highly motivated and my work ethic is second to none.
